EDUCATION

B.Tech in Computer Science & Engineering (AI & ML) — **CGPA: 8.22 / 10** — 2025 – 2029
Adani University, Gujarat | Current: 2nd Year • **JEE Mains: 93.27%ile**

Higher Secondary (Class XII, Science) — Parth School of Science & Tech. — **84.87 Percentile** — 2025

Secondary School Certificate (Class X) — Ambe School — **89.77 Percentile** — 2022

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+), C, SQL
Web & Backend:	FastAPI, Flask, Streamlit, RESTful APIs, HTML5, CSS3, PostgreSQL
AI & Automation:	Gemini API / Google AI Studio, LLM Prompt Engineering, Web Scraping, Data Extraction
Developer Tools:	Git, GitHub, VS Code, Linux Basics, Excel Automation, Codeforces, HackerRank
Core Interests:	Applied AI/ML, AI Agents, Backend Engineering, Performance & SEO Optimization

WORK EXPERIENCE

SATVAWEB — June 2026 – July 2026
Software Engineering & Web Development Intern — Remote / Work from Home

- **Website Performance & SEO Analyzer:** Engineered automated diagnostic utilities using Python and JavaScript to audit Core Web Vitals, page speed metrics, and on-page technical health indicators.
- **Automated Data Pipelines:** Built Python scripts for automated Excel report generation and metric aggregation, eliminating hours of manual documentation weekly.
- **Activity Tracking System:** Designed an employee workflow tracking platform to monitor project milestones and compute team productivity metrics.

KEY TECHNICAL PROJECTS

Domain Intelligence & SEO Auditor — Python, Streamlit, REST APIs **[Live Demo ↗]**

- Developed an end-to-end website diagnostic tool auditing critical SEO tags, canonical URLs, Open Graph schemas, structured data, internal links, image alt text, and page load latency.
- Engineered JavaScript-rendered DOM inspection and bot-protection / WAF detection routines to evaluate dynamically rendered client websites.
- Implemented multi-format export capabilities for actionable client-facing optimization roadmaps.

SafeSphere — Women's Safety & Rapid SOS Platform — JavaScript, Geolocation APIs **[Project Demo ↗]**

- Engineered a safety-focused web application integrating one-touch SOS dispatch, real-time geolocation sharing, and trusted emergency contacts.
- Built resilient alert dispatching and safety directory resources under the TechFusion / Vibe 2 Vision hackathon initiative.

Air Pollution & Environmental AQI Intelligence — Python, Data Analysis | Hackathon Finalist

- Built an environmental monitoring dashboard synthesizing historical atmospheric parameters and real-time Air Quality Index (AQI) readings.
- Qualified as a national hackathon finalist by presenting predictive pollution trend visualizers and community advisory metrics.

HACKATHONS & ACHIEVEMENTS

- **Smart India Hackathon (SIH 2026):** Cleared university-level internal selection round for building scalable technological solutions.
- **Tech Eximius Hackathon:** Advanced through prototype presentation and technical evaluation rounds to the finals.
- **Speaker & Recognition:** Presented technical talk on *"Artificial Intelligence and Society"* at Adani University; recipient of GitHub Student Developer Pack.
- **Competitive Coding:** Active problem solver on Codeforces and HackerRank, focusing on algorithmic data structures and Python optimization.
